## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Specie 1 directed to Figure 1, Specie 2 directed to Figure 3, Specie 4 directed to Figure 4, Specie 5 directed to Figure 5, Specie 6 directed to Figures 6a-6c, Specie 7 directed to Fig. 8, Specie 8 directed to Figure 8a, Specie 9 directed to Figure 9, Specie 10 directed to Figure 10, Specie 11 directed to Figure 11, Specie 12 directed to Figure 13, Specie 14 directed to Figure 17, Specie 15 directed to Figures 18-19, Specie 16 directed to Figure 20, Specie 17 directed to Figure 23, Specie 18 directed to Figure 25, and Specie 19 directed to Figure 26.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Please note that the Examiner has made a cursory review of the claims and would like to indicate that in the majority of the independent claims there is a 112, second paragraph combination-subcombination indefiniteness issue where the preamble of the claim is directed to a shaft member **for** a surgical device having tissue engaging means and a handle assembly but in the body of the claim, there is a positive recitation of the tissue engaging means and/or the handle assembly. If Applicant

amends the claims to clarify the indefiniteness so that the claims are directed to just the subcombination, Applicant is advised that those claims would be subject to a combination-subcombination restriction as well.
